Drs. Michael Dachowski, Michael Sock and Austin Daly offer comprehensive evaluation and treatment options as well as the best patient education, safety, privacy, comfort and surgical outcomes. They strive to provide the best possible care for all patients and their ultimate goal is to make patients' experience exclusive and second to none.

Drs. Dachowski and Sock are board certified, and Dr. Daly is board eligible. Their expertise ranges from corrective jaw surgery to wisdom tooth removal. They also diagnose and treat facial pain and injuries and TMJ disorders, as well as the full range of dental implant and bone grafting procedures.

Pennsylvania Dental Implant and Oral Maxillofacial Surgery Associates' vision is "excellence in treatment with trusting compassionate care." They aim to enhance patients' ability to maintain dental health, to function, and to confidently present themselves esthetically by providing individualized care. They build a trusting relationship and utilize scientifically proven innovative advancements in oral maxillofacial surgery, dentistry and dental implant restoration.

Drs. Dachowski, Sock and Daly, through their professional affiliations, are associated with a team of high-level dental, medical and technical specialists who share a common philosophy toward proactive healthcare. Today, it is practically impossible for a single provider to perform all of the related dental and medical services a patient might require at the highest standard. This has been understood as specialized dentistry and medicine. Pennsylvania Dental Implant and Oral Maxillofacial Surgery Associates maintains that surgery is best provided by educated and credentialed surgeons. Today's health problems are managed with more scrutiny, from every aspect. And there has to be value. Many times, collaboration is required to safely produce the desired outcome.
